PROFESSIONAL SUMMARY

AI Engineer, Generative AI Engineer, Machine Learning Engineer, Data Scientist, Backend Developer, and RTM Operations Analyst experienced in designing, developing, and deploying production-grade AI, ML, LLM, RAG, BI, backend, and data pipeline solutions. Skilled across the full AI and Data Science lifecycle, including data acquisition, preprocessing, EDA, feature engineering, model development, evaluation, optimization, deployment, MLOps, monitoring, and continuous improvement. Proven ability to build intelligent automation, business intelligence dashboards, scalable backend services, and secure production systems that improve operational efficiency, support data-driven decision-making, and accelerate business growth.

PROFESSIONAL EXPERIENCE

RTM and Operations Data Analyst | Outsourcing Skill | Jun 2026 – Present

- Monitor operational performance across VICIdial outbound campaigns using Python, SQL, Excel, and Power BI dashboards, ensuring Service Level Agreement (SLA) compliance and real-time adherence.
- Design KPI frameworks and automated reporting pipelines covering sales conversion, approval rates, QA scores, and agent productivity; reduced manual reporting time and improved reporting accuracy for Operations Managers.
- Build interactive Business Intelligence (BI) dashboards for executive management tracking leads, transfers, sales, revenue, quality, and agent performance; support workforce planning and operational forecasting through trend and performance analysis.

Data Scientist and ML Engineer | Vmax | Jul 2025 – May 2026

- Engineered an end-to-end Machine Learning (ML) data pipeline processing 20,000+ automotive sales records, feeding real-time CRM reporting layers and executive Business Intelligence (BI) dashboards; delivered Power BI and Streamlit dashboards that improved cross-team data accessibility by 35%.
- Analyzed CRM 8X deal-flow and sales data using Python and Power BI to surface revenue-pipeline insights, driving a 40% reduction in manual tracking overhead through workflow automation and data-driven process improvement.

AI Developer and Automation | Hoven | Feb 2025 – Oct 2025

- Remotely contributed to automation and AI development projects for Hoven Saudi Arabia.
- Improved reporting accuracy by 25%, Reduced manual data entry by 50%.
- Automated sales workflow integration across 3 platforms (Shopify, Salla, Odoo).
- Automated workflows and Python scripts using n8n, Make, and Zapier.

Data Scientist and ML Engineer | Mostaqi (Freelance) Feb 2025 – Present

- Produced Python-based customer churn predictive models using XGBoost, Random Forest, and scikit-learn ensemble methods on client-provided data, applying feature engineering and cross-validation to maximize predictive analytics accuracy and deliver actionable retention recommendations.

PROJECTS

ACEB — AI Cybercrime Evidence Builder Legal-Tech RAG Platform | [live APP](#)

Key technologies: Python, FastAPI, React, ChromaDB, LangGraph, OCR, PostgreSQL, Redis, Docker

- ACEB: Built an Arabic-first AI legal-tech SaaS platform that converts screenshots, PDFs, and chat logs into court-ready cybercrime complaint reports; designed an 8-service FastAPI microservices architecture with OCR extraction, ChromaDB Retrieval-Augmented Generation, citation-forcing LLM classification, LangGraph Attacker/Judge verification agents, evidence scoring, and Arabic RTL PDF generation, achieving 20/20 end-to-end test cases, 0 unsupported claims, and sub-90-second report generation.

DocMind AI — Enterprise Document Intelligence RAG Platform | [APP Code](#)

Key technologies: FastAPI, React, FAISS, LLMs, SQLite, SQL, Docker

- DocMind AI: Built an enterprise-grade Retrieval-Augmented Generation (RAG) document intelligence platform with multi-modal PDF, spreadsheet, and SQL analysis; implemented FAISS semantic search, persistent SQLite chat memory, schema-aware NL-to-SQL generation, anomaly detection, and secure FastAPI workflows, reducing document research time by 85% and saving 12–15 hours weekly per knowledge worker.

Sales Forecasting for Car Sales — Time-Series Forecasting & Power BI Analytics | [App Code](#)

Key technologies: Python, Pandas, Scikit-learn, ARIMA, Power BI, DAX

- Sales Forecasting for Car Sales: Built an end-to-end data science pipeline for automotive sales forecasting, including data cleaning, exploratory data analysis (EDA), outlier handling, feature engineering with seasonality and lag variables, ARIMA time-series modeling, and Power BI dashboard development with DAX KPIs; achieved 85% forecast accuracy.

Fine-Tuned BERT Sentiment Classifier | [App Code](#)

Key technologies: PyTorch, Hugging Face Transformers, Streamlit, Scikit-learn

- BERT NLP Classifier: Optimized a Hugging Face Transformer model via PyTorch fine-tuning, achieving 91% accuracy on natural language processing (NLP) sentiment classification with an interactive Streamlit deployment.

Marketing Analytics & Demand Forecasting Pipeline | [Live Code](#)

Key technologies: Python, Pandas, Prophet, Power BI, Streamlit

- Marketing Pipeline: Built an end-to-end analytics pipeline covering exploratory data analysis (EDA), data cleaning, Prophet time-series forecasting, and multi-tab Power BI and Streamlit dashboards for stakeholder KPI reporting.

INTERNSHIPS

Generative AI Engineer Intern | EYouth for Development | Oct 2025 – Present

- Deployed production-grade Retrieval-Augmented Generation (RAG) systems with semantic re-ranking and chain-of-thought prompt engineering; designed autonomous multi-agent AI systems; implemented LLM fine-tuning (LoRA, PEFT) across transformer and diffusion model architectures.
- Designed autonomous AI agents with planning, tool integration, memory systems, and

Full-Stack Developer Intern | Cloudjet LLC — Jun 2025 – Sep 2025

- Built PHP/MySQL backend services and JavaScript/HTML5 frontend interfaces; hardened systems against SQL Injection, XSS, CSRF, and RCE vulnerabilities; awarded 1st Place in the internship project competition.

Data Scientist Intern | DEPI EYouth for Development | Oct 2024 – May 2025

- Processed and analyzed 100,000+ record datasets in Python and Power BI; constructed stakeholder KPI dashboards with data visualization; improved classification model performance by 12% through hyperparameter tuning.

Product Manager Trainee | INJAZ Egypt – Apr 2026

- Applied product lifecycle practices, including discovery, MVP design, competitive analysis, KPI definition, and revenue-stream modeling, to connect user needs with data-informed product decisions.
- Supported business model design, value proposition analysis, revenue-stream planning, and competitive positioning to improve product strategy and data-informed decision-making.

Freelancer Intern — ITIDA Gigs | Jan 2025

- ITIDA Gigs (Jan 2025 – Apr 2025): Acquired freelance project scoping, client communication, and service-delivery skills through a structured program supervised by EYouth for Development.

EDUCATION

Cairo University — Faculty of Science 2022 – Present

Bachelor of Science (B.Sc.), Computer Science — Cairo, Egypt

TECHNICAL SKILLS

Programming: Python, PHP, Node.js, React, MySQL, SQL, JavaScript

AI & Generative AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, AI Agents, LLM Fine-Tuning (LoRA, PEFT)

Machine Learning: Machine Learning, Deep Learning, NLP, Feature Engineering, Model Evaluation, Hyperparameter Tuning

Data Science & Analytics: Exploratory Data Analysis (EDA), Statistical Analysis, Time-Series Forecasting, Data Visualization

Backend & APIs: FastAPI, REST APIs

Business Intelligence: Power BI, KPI Development, Dashboard Development

MLOps, Cloud & Deployment: Docker, Kubernetes Container Orchestration, MLflow, AWS, AWS SageMaker, Azure, Azure ML Studio, GCP, Model Deployment, Automation

Databases & Tools: PostgreSQL, Git, GitHub, Jupyter Notebook, Postman

CERTIFICATIONS

- AI and ML Engineer — Tech Academy (2025) • Data Analysis with AI — EYouth (2025) • ML Tree-Based Models — DataCamp (2025) • Python (Intro + Intermediate) — DataCamp (2025) • Data Tools — IBM (2025) • Power BI — ITI (2025)

Additional: Arabic (Native) · English (B1) | 1st Place Cloudjet LLC (2025) | CU-AI NEXUS Speaker (2025)
