SUMMARY

- Computer Science student at Cairo University with a strong foundation in software engineering, Machine Learning, and Generative & Agentic AI.
- Experienced in building end to end ML pipelines, autonomous AI agents, RAG based systems, data visualization dashboards, and full stack web applications.
- Strong problem solving and analytical skills with a passion for AI driven automation, scalable systems, and business focused AI innovation.

EDUCATION

- **Cairo University – Faculty of science | 2022 - Present**
- B.Sc. Degree in Computer Science Department.

Work Experience

Data Scientist and ML Engineer | Freelancer Mostaq | February 2025 – Present

- Developed a machine learning model for prediction customer churn using Collab.
- Trained and evaluated the model on a dataset of customer data with Python.
- Collaborated with the client to understand their requirements and solution.

Data Scientist and ML Engineer | Vmax | July 2025 – Present

- Built end-to-end ML pipeline processing 20K+ sales records
- Developed interactive dashboards using Power BI, React, and Streamlit to visualize sales and performance metrics, improving data accessibility by 35%
- Work on CRM 8X to manage the sales deals and get business insights for sales.
- Designed a CRM Callbacks with PHP and React.

Ai Developer and Automation | Hoven | Oct 2025 – February 2025

- Hoven Saudi Arabic Company (Remote).
- Improved reporting accuracy by 25%, Reduced manual data entry by 50%.
- Automated sales workflow integration across 3 platforms (Shopify, Salla, Odoo).
- Automated work flows and scripts python in n8n, make and Zapier.

Internships

Data Scientist Intern | OCT 2024 – May 2025

- Digital Egypt Pioneers Initiative (DEPI) Cairo, Egypt.
- Under The Supervision of EYouth for Development.
- Analyzed datasets Processed datasets with 100K+ records.
- Built dashboards to communicate insights using Python and Power BI.
- Improved model performance by 12% after hyperparameter tuning.

Freelancer Intern | ITIDA Gigs | JAN, 2025 – April, 2025 | online

- Under The Supervision of EYouth for Development.
- Prepare for freelance work and learn how to get a job and first Client.

Cloudjet LLC Company – Full Stack (PHP-JS-MySQL) | June 2025 – SEP 2025

- Gained experience with Backend in PHP connected with DB with phpMyAdmin.
- Gained experience with Frontend JS, CSS, HTML to make creativity Design.

- Work on server as FileZilla, Xampp and PhpMyAdmin to manage the DB.
- Work on Real-time problem for company and solve tasks.
- Gained experience with the Security for websites and how to protect it from attacks.

Generative AI Engineer Intern– DEPI Eyouth | OCT 2025 – present.

- advanced specialization in Generative & Agentic AI, covering Transformers, Diffusion Models, and LLM fine tuning (LoRA, PEFT).
- Designed autonomous AI agents with planning, tool integration, memory systems, and multi-agent orchestration workflows.
- Built RAG pipelines with re ranking and context optimization, applying advanced prompt engineering and reasoning techniques, built autonomous agents integrating external APIs.
- Deployed production style AI solutions with monitoring, scalability, and cost optimization strategies.

Product Manager Trainee– INJAZ Egypt | Jan 2026 –Mar 2026.

- Applied product management lifecycle practices (discovery, validation, MVP design, and iteration) to simulate real world startup environments.
- Explored different leadership and CEO management styles to understand their impact on product direction, execution speed, and team performance.
- Participated in business model design, focusing on value proposition, revenue streams, and competitive positioning.

PROJECTS

Sports Training Management System – 1st Place Winner, Internship Competition ([Link](#))

- Developed a secure, full-stack platform managing **200+ users** (clubs, coaches, and players).
- Implemented advanced security (SQL Injection, XSS, CSRF, RCE prevention)
- Proposed SaaS business model projected to increase revenue by **25%** in 1 year.

VMAX Sales Management CRM Website – Developed for company ([Link](#)).

- Built a web-based CRM system end-to-end ML pipeline processing 20K+ sales records.
- Improved sales reporting efficiency by 35%.
- Reduced manual CRM tracking time by 40% via automation.

Predictive Modeling & Optimization Student Behavior ([Link](#))

- Built a student behavior analysis and prediction system preprocessing pipeline, achieving up to 93% prediction accuracy and providing actionable insights via interactive dashboards.
- Identified top 3 behavioral predictors impacting student success.

Sales Forecasting and Optimization for Car Sales ([Link](#))

- As Graduation project from DEPI, Cleaning, Analysis and visualization for data to show the features, make a Sales Forecasting for car Dataset and show the price next 30 days from last training models and make a dashboard with Power Bi.

Fine-Tuned BERT Sentiment Classifier | Streamlit App ([Link](#))

- Built and deployed a BERT-based text classifier using Hugging Face & PyTorch & Transformers. Achieved 91% accuracy and created an interactive web demo.

DCGAN Digit Generator | Streamlit App ([Link](#))

- DCGAN in PyTorch, torchvision to synthesize handwritten digits. Visual interface allows real-time generation and retraining demo.

Life code Digital Health Emergency System | Full stack ([Link](#))

- Developed Engineered a full-stack emergency medical system enabling instant access to patient data via NFC/QR, reducing emergency response lookup time by 70–90%.
- Implemented secure cloud architecture (JWT, encryption, access control) to protect sensitive health data while enabling real-time access for first responders.
- Designed high-performance backend with Redis caching (sub-10ms reads) and secure API gateway (rate limiting, DDoS protection), achieving 90% availability for critical emergency access.

SKILLS

- **Programming Languages:** Python, SQL, JavaScript, HTML, CSS, Java, and PHP.
- **Software Development:** Node.js, React, Mongo DB, Docker, Postman and API.
- **Technical:** Data Science, machine learning, AI, Database, OOP and Data structure.
- **Other Tools:** GitHub, Odoo, Salla, CRM, Visual Studio Code, Jupiter and Notion.
- **Frameworks & Tools:** TensorFlow, PyTorch, Keras, Hugging Face and MLflow.
- **Data & Visualization:** Pandas, Matplotlib, Seaborn, Plotly and Power BI.
- **Sec Security:** safeguards against SQL Injection, XSS, RCE, WAF, logging, and backups.
- **Soft Skills:** Problem-solving, teamwork and communication.

CERTIFICATES

- Summer School on Intellectual Property program | Organized by the National Intellectual Property Office | 2021.
- Introduction to Python & Intermediate Python | Data Camp | 2025
- Data Tools and Languages | IBM | 2025
- Machine Learning Tree Based Models | Data Camp | 2025.
- Data Analysis with AI Boot Camp | EYOUTH | 2025
- 1 Trainer – Internship Program | Cloudjet LLC | 2025
- 1 Place – Internship Project Competition | Cloudjet LLC | 2025
- CU-Ai NEXUS – Talked About Ai and Start-up Company | Cairo University | 2025
- Power BI – course | ITI | 2025
- AI & machine learning Engineer | tech academy | 2025

VOLUNTEERING

- Volunteer at the Mission Charity Association | 2022-Present

LANGUAGES

- Arabic: Mother Tongue
- English: B1
